

EV Motor Materials Monthly Report

MONTHLY REPORT AND DATA SERVICE

Monthly Digital Report and Data EV Motor and Materials Market Tracker Key Supply, Demand and Price Developments

Monthly Report Highlights:

1. Motor Power Deployment

- Monthly review of motor power (kW) deployed by region, country, motor type, motor maker, EV maker, EV model, EV type and more

2. NdFeB Magnet Consumption

- Monthly review of NdFeB magnet (kg) deployment by region, country, motor type, motor maker, EV maker, EV model, EV type and more

3. Latest Market Developments

- Monthly review of key supply-side market developments
- Monthly review of key demand-side market developments

4. Latest Price Developments

- Monthly review of magnet rare earth oxide price developments
- Monthly review of magnet rare earth metal price developments
- Monthly review of NdFeB alloy price developments

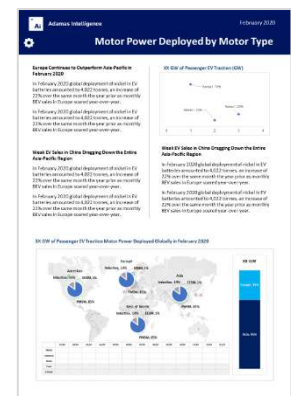

5. Monthly Report + Excel Data

- Access to the proprietary data behind the monthly report's charts, tables and figures

The 'EV Motor Materials Monthly' is a subscription-based report and data service for tracking monthly deployment of passenger EV traction motor power (in kW) and NdFeB magnets (in kg) by region, country, motor type, EV type, make, model, and motor supplier on an ongoing basis.

The 'EV Motor Materials Monthly' is a must-have subscription for automakers, motor manufacturers, magnet manufacturers, miners, explorers, investors, and other stakeholders with a professional interest in the EV, motor or motor materials industries.

Spend less time collecting, analyzing, and fact-checking data, and more time making informed decisions.

Essential tool for:

- Automakers
- Motor Manufacturers
- Power Electronics Suppliers
- Magnet & Metals Producers
- Exploration & Mining Companies
- Informed Investors and Financiers
- Government Agencies
- Industry Stakeholders
